# MEMBERSHIP LEVELS 2026

Business districts should self-select to join or renew at the membership level that best matches the current stage of the business district's evolution. The definitions below help business districts strategically assess their current association development, plan for future growth, and choose their membership level. Note that this is only a suggestion and districts can join at any level they choose.

#### Sustaining - \$1,650 (\$1,450 before 1/1/26)

Includes designation on member list and website.

## Large and/or Established - \$1,400 (\$1,250 before 1/1/26)

- Large Business district has consistent membership/support and stable funding. Total annual business district unrestricted revenue is \$25,000\* or more.
- Established Business district is in 6th year or longer of operations and/or has established a long track record of successful services and events.

# Medium and/or Growing - \$950 (\$850 before 1/1/26)

- Medium Business district is experiencing significant membership/support growth.
   Total annual business district unrestricted revenue is \$5,000 to \$24,999\*.
- Growing Business district is in 3rd to 5th year of operations and is still investing in new programs, services and benefits.

# Small and/or Year 2+ - \$450 (\$400 before 1/1/26)

- Small Business district is just beginning to build membership/support. Total annual business district unrestricted revenue is less than \$5.000\*.
- Year 2+ Business district is in the second full year of operations following incorporation and/or is just beginning to provide services.

While Venture Portland hopes business district associations increase their membership level as the district evolves, we understand changes to association status and district development may impact level choice.

\*Total business district revenue should reflect sources of funding that are not restricted to existing programs. This includes membership revenue, sponsorship revenue, etc.
